Guiding Discussion Questions

Rural Health Care Delivery Workgroup-

Transportation and Access to Care Advisory Group

October 18th, 2016

- 1) In terms of health care delivery, what are the greatest transportation/ access to care barriers in rural Maryland/five jurisdictions of interest?
- 2) In terms of current programs, what is working and what is not working? How is “success” or “what is working” determined or evaluated?
- 3) Can the public transportation system be improved to meet the health needs of the population?
- 4) What are the essential components to creating, implementing and sustaining successful programs to improve access issues created by transportation barriers? Are there current models that could be explored/replicated?
- 5) How can innovative programs that improve access be sustained?
- 6) How has the Freestanding Medical Facility in Queenstown impacted the EMS system?
